

Commodity Inspection Services

From its family beginnings in 1872, CIS is now rendering worldwide inspections protecting your interests in international trading at both ends, loading and discharge. Still a family owned and managed company, it is continually developing and offering a total service based on commitment and expertise.

of field inspectors, engineers and expeditors of an average of 1,450.

Today, more and more customers are discovering the benefits of commissioning CIS in all their transactions.

The scope and efficiency of our services are second to none.

It is recognizable wherever our international specialists are based around the globe, in all facets of commodity transactions; manufacturing, shipping, delivery, processing and reprocessing. Either for one of the contracted parties or as an unbiased and independent facility for all parties.

CIS offers services in over 75 countries through a network of some 125 offices with a total staff

Services

Analyses and evaluations are carried out promptly and efficiently. Recognizing the needs of industry and government for both speed and accuracy.

Consistently, through a program of planned development, we have refined and added to our capabilities to perform quality as well as quantity determinations and to provide skilled technical staff for onsite supervision.

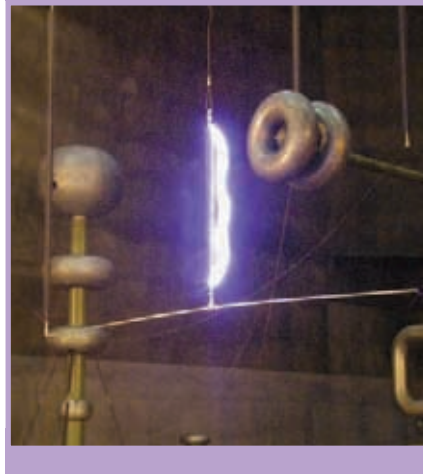

An ongoing schedule of personnel training ensures a team of specialized and competent staff who produce, using the most up to date and appropriate methods, accurate assessments rapidly, thus reducing commercial risks for clients.

High Quality Services

Certified ISO 9001 : 2000 by

Certification for Russia

As from 1992 Russian law came into force making it mandatory that many products bound for Russia are tested and certified in accordance with the GOST R, RTN & Hygiene standards. CIS offer a fast and reliable certification service for the main industries including oil and gas sector.

Inspection/Expediting of Plant Equipment and Industrial Products

CIS has a wealth of experience in all aspects of inspection/expediting of industrial products and machinery. In an area demanding the highest levels of technology we have built a solid international reputation constantly improving our services to our clients. Our inspection/expediting covers power boilers, heat recovery steam generators, various unfired pressure vessels, steam turbines and much more.

Inspection of Bulk Cargoes

At CIS, we are well-versed in the testing and sampling of bulk materials such as cereals, sugar, vegoils, ores, coal etc. Bulk sampling is conducted by our own inspectors to a rigorous system of checks, ensuring maximum precision at all stages.

Inspection of Agricultural Products

CIS carries out extensive quality control using stringent checks, and establishing grades and results based on appropriate sampling and analysis methods for each particular product. With an emphasis on quality,

inspection of food and feedstuff is carried out. Food additives and contaminants are also analyzed.

This work is carried out either in Rotterdam or at research facilities worldwide.
